

EQACC SOLAR

Canada solar container outdoor power repair

Overview

How does Canadian Solar ensure a safe supply chain?

Canadian Solar closely examines our supply chains to ensure goods imported are not mined, produced or manufactured, wholly or in part, with prohibited forms of labor, i.e., slave, convict, indentured, forced or indentured child labor. Copyright © Canadian Solar. All rights reserved.

How to choose a Canadian Solar inverter?

The inverter is selected according to system requirements. The inverter power should match the maximum PV modules power, and the DC/AC ratio should match the radiation condition, basically 1.1 to 1.3 DC/AC ratio can be selected, and Canadian Solar inverter support 1.3 DC/AC ratio.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

Is a solar system safe?

Take China for example, the electricity generated by the solar system will be used by family load first. When the real-time power generation exceeds the real-time electricity consumption needed, the extra part will automatically connect to the grid. In the contrary, the grid will supply the gap to family load. Yes, the system is safe.

 Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 100W DC Input Overlimit
- Max. PV Input Current 15A, Compatible with High-Power Modules

 Intelligent Simple O&M

- IP65 Protection Design, support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 Flexible Abundant Configuration

- Plug & Play, EPS Switchover Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
