

**EQACC SOLAR**

# **Canadian solar container lithium battery energy storage**

## Overview

---

Will Canadian Solar E-storage supply 1.8gwh of battery energy storage systems?

Canadian Solar's e-STORAGE will supply 1.8GWh of battery energy storage systems (BESS) for two projects by Aypa Power in the US.

What is the capacity of e-storage battery?

The system has a nominal capacity of 5 MWh and a roundtrip efficiency of up to 95%. E-storage, the battery unit of Chinese-Canadian PV manufacturer Canadian Solar, has launched a new battery solution for utility-scale applications.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

Who is solar power & battery energy storage company?

It is a leading manufacturer of solar photovoltaic modules, provider of solar energy and battery energy storage solutions, and developer of utility-scale solar power and battery energy storage projects with a geographically diversified pipeline in various stages of development.
