

**EQACC SOLAR**

# **Canberra Off-Grid solar Inverter**

## Overview

---

Do you need an off-grid solar system in Canberra?

One of the biggest advantages of having an off-grid solar system in Canberra, ACT is reduced energy costs, as rural consumers are often asked by utility providers to pay excessive grid connection fees. If your building can't connect to the local power grid, an off-grid system is exactly what you need.

What is an off-grid Solar System?

Off-Grid solar systems are self sufficient and function entirely free of the national electricity grid. They combine solar panels, inverters, batteries, and backup generators for emergencies, offering energy independence like never before. Solar panels power your home during daylight hours. Batteries handle your energy needs at night.

How reliable is off-grid solar power?

Off Grid Solar Power can be as reliable and affordable as being connected to the grid. With today's lithium battery technology combined with the new generation of solar battery system inverters and chargers, anyone can produce their own electricity, in any remote location.

Can GES energy install an off-grid Solar System?

Our in-house, SAA-accredited off-grid solar specialists can supply, design and install an off-grid system for you, even if you're located in an isolated area without access to the local grid. With GES Energy on your side, you can have peace of mind knowing that your off-grid system will be installed correctly.
