China molded circuit breaker in New-Zealand

Overview

What is a molded case circuit breaker?

A molded case circuit breaker (MCCB) is a type of electrical protection device that is used to protect the electrical circuit from excessive current, which can cause overload or short circuit. MCCBs can be used for a wide range of voltages and frequencies with adjustable trip settings.

What is a molded case circuit breaker (MCCB)?

ComPact molded case circuit breakers (MCCBs) protect cables sized for 100A to 3200 A. Their highest breaking capacities allow them to protect also smaller cables, when connected close to a powerful energy source.

What is a MCCB breaker?

MCCBs are the typical choice of breaker in switchboards or for direct power supply to large equipment. They are particularly well-suited for commercial and industrial applications that demand a higher capacity for low voltage power compared to miniature circuit breakers (MCBs).

What is a tembreak pro circuit breaker?

NHP's moulded case circuit breakers provide high performance protection for circuits ranging from 20A to 3200A suitable for various AC and DC voltages. With a mixed blend of trip unit technologies there are suitable options for any application. The TemBreak PRO range is the ultimate solution for reliable circuit protection.

China molded circuit breaker in New-Zealand

China Molded Breakers

China Molded Breakers - Select 2025 high quality China Molded Breakers products in best price from certified Chinese manufacturers, suppliers, wholesalers and factory on Made-in-China
