

EQACC SOLAR

China s largest island power base station

Overview

This groundbreaking project, located on the coastal tidal flats of the Yudong Reclamation Area in Rudong County, marks a significant milestone as China's first integrated offshore facility combining PV power generation, hydrogen production and refueling, and energy storage, all within a framework of comprehensive energy utilization and coastal ecological restoration. What is Mengxi blue ocean photovoltaic power station?

Mengxi Blue Ocean Photovoltaic Power Station, China's largest single-capacity photovoltaic power plant built on coal mining subsidence area, was connected to grid and started operation on November 5. The project is expected to generate 5.7 billion kilowatt-hours of electricity annually, sufficient to power two million households.

What is the powerchina Chengdu integrated base?

This integrated base is one of the country's nine major clean energy bases, developed under the unified leadership of the Yalong River Hydropower Development Company Ltd, while the base's planning and research were mainly completed by the POWERCHINA Chengdu Engineering Corporation Limited.

How many hydropower stations does Yalong River base have?

The Yalong River Base has launched seven large hydropower stations and five new energy projects, with a total installed capacity of nearly 21 million kilowatts and an annual power generation capacity of about 90 billion kilowatt-hours.

What is a Gobi-wasteland power station?

The power station site hosts the country's first large-scale outdoor photovoltaic testing base in a desert-Gobi-wasteland climate zone, providing an effective model for large-scale solar development in such areas. Integrated installation of photovoltaic panels and mounting brackets.
