

# Classification of solar container energy storage systems in Sri Lanka power plants

## Overview

---

What is Solar Resource Atlas of Sri Lanka?

The Solar Resource Atlas of Sri Lanka is an important addition to the existing knowledge on solar resources of Sri Lanka. The first solar atlas of Sri Lanka was prepared by the National Renewable Energy Laboratory (NREL) of USA, in 2005, as the Wind and Solar Resource Atlas of Sri Lanka and Maldives.

How much solar radiation does Sri Lanka receive?

Sri Lanka receives significant amount of solar radiation across all geographical regions. The Global Horizontal Irradiance (GHI) varies between 1,247 kWh/m<sup>2</sup> to 2,106 kWh/m<sup>2</sup>. It is interesting to note that the intensity of solar irradiation in lowland areas is high compared to mountainous regions.

What is energy storage system (ESS)?

An energy storage system (ESS) will enable smart grid concepts which is one of the encouraging technologies in the future. Eliminating the fluctuations related with their power production, ESSs may facilitate the integration of renewable energy systems.

Who created the first solar atlas of Sri Lanka?

The first solar atlas of Sri Lanka was prepared by the National Renewable Energy Laboratory (NREL) of USA, in 2005, as the Wind and Solar Resource Atlas of Sri Lanka and Maldives. Such attempts in exploring solar resources of the country provided valuable information leading to gross estimates of solar potential.
