**Communication builds base  
stations as soon as possible**

## Overview

---

Do communication base station operations increase electricity consumption in China?

Comparing data from 2021, 2025, and 2030, <sup>41</sup> we found that the electricity consumption due to communication base station operations in China increased annually.

How much energy does a communication base station use a day?

A small-scale communication base station communication antenna with an average power of 2 kW can consume up to 48 kWh per day. <sup>4,5,6</sup> Therefore, the low-carbon upgrade of communication base stations and systems is at the core of the telecommunications industry's energy use issues.

How does a communication base station upgrade affect emissions?

(D) Total emissions of major pollutants (CO<sub>2</sub>, NO<sub>x</sub>, SO<sub>2</sub>, and PM<sub>2.5</sub>) generated by the electricity consumption of communication base stations before and after the upgrade. Paired bars with the same color represent pre- and post-upgrade comparisons for the same pollutant. Emissions of all pollutants are significantly reduced after the upgrade.

How does a base station work?

In this scheme, the base station is powered by solar panels, the electrical grid, and energy storage units to ensure the stability of energy supply. When there is a surplus of energy supply, the excess electricity generated by the solar panels is stored in the energy storage units.

## Communication builds base stations as soon as possible

---

### Beijing Builds Nearly 150,000 5G Base Stations, Ranking First ...

Information network infrastructure is being deployed at an accelerated pace, with nearly 150,000 5G base stations built across the city, the highest number in the country. ...

### Communication Base Station Innovation Trends , Huijue ...

Rethinking Infrastructure for the 5G-Advanced Era As global mobile data traffic surges 35% annually, communication base stations face unprecedented demands. Can traditional tower ...

### China to construct over 4.5 million 5G base stations in 2025

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next ...

**mobile communication base**

## stations

China's mobile communication base station market is poised for significant growth, driven by the rapid expansion of 5G technology and the increasing demand for high-speed internet ...

### China to construct over 4.5 million 5G base ...

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support ...

### Low-carbon upgrading to China's communications base stations ...

As China rapidly expands its digital infrastructure, the energy consumed by communication base stations has grown dramatically. Traditionally powered by coal ...

### Ambitious 5G base station plan for 2025

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology.

With 4.19 ...

## CBN Builds 578,000 700M 5G base stations

China Broadcasting Network, in collaboration with China Mobile, has built and shared 578,000 700M 5G base stations, with over 3.8 million 4G /5G base stations in use. The 700M 5G ...

## China builds world's largest 5G network with 4.7 million base stations

China had about 4.71 million 5G base stations by the end of September, amid its efforts to strengthen its cyber infrastructure. Over the last five years, China has built the ...

## Beijing Builds over 110,000 5G Base Stations, Industrial News

At the Beijing Unicom's press conference on the new quality of life in the all-optical scene, Su Shaolin, Secretary of

the Party Group and Director of the  
Beijing Municipal ...

### **mobile communication base stations**

China's mobile communication base  
station market is poised for significant  
growth, driven by the rapid expansion of  
5G technology and the ...

### **China's 2024 Achievements in Communication Infrastructure ...**

The continued construction of 4G base  
stations provides strong support for  
ensuring the stable operation of existing  
networks and meeting user needs, while  
the rapid ...
