

**EQACC SOLAR**

# **Communication green base station grounding installation requirements standard**

## Overview

---

What is grounding and bonding for communications systems?

UNDING AND BONDING FOR COMMUNICATIONS SYSTEMSPART 1 - GENERAL1.1 DESCRIPTIONA. This section specifies grounding and bonding requirements of communications installations based on the requirements of ANSI/TIA 607-D, Telecommunications Bonding and Grounding (Earthing) for Customer Premises. Work covered by this Section shall.

What are the requirements for a telecommunications main grounding bus (TMGB)?

A. Refer to Section 27 05 00 for requirements that shall be fulfilled as part of this specification section. Telecommunications Main Grounding Bus (TMGB). Provide (1) 24-inch x 4-inch x 1/4-inch (600mm x 100mm x 6mm) tinned copper UL listed busbar with pre-drilled two-hole bonding lugs.

What are the standards for cell site grounding & telecommunications tower grounding?

Our cell site grounding, telecommunications grounding and communication tower grounding methods closely follow the Motorola R56 standards and IEEE Std 142-1991 and IEEE Std 142-2007 recommended Practice for Grounding of Industrial and Commercial Power Systems guidelines for cell site and telecommunications sites.

How do you test a telecommunications grounding system?

Install telecommunications grounding system so resistance to grounding electrode system measures 5 ohms or less. Measure grounding electrode system resistance using an earth test meter, clamp-on ground tester, or computer-based ground meter as defined in IEEE 81.
