# Computer room renovation AC inverter

## Overview

---

What is a computer room air conditioning (CRAC)?

A Computer Room Air Conditioning (CRAC) unit is designed for applications where close control, high precision air conditioning is essential.

Why do computer rooms need a central air conditioning control system?

Usually, these units operate unattended, which requires them to communicate with each other to ensure collaborative work. Necessary redundancy, backup, and even rotation functions are necessary. CORESTAR provides precision air conditioning control solutions for computer rooms, ensuring efficient temperature & humidity regulation in data centers.

What makes a good Inverter air conditioner?

With advancements in technology, many now include features like smart controls and eco modes to further enhance convenience and performance. Look for inverter air conditioners with ENERGY STAR certification for up to 47% annual energy savings and optimal efficiency ratings like 17 SEER2.

What is a data center air conditioning system?

A data center air conditioning system must always be viewed holistically. Paired with cutting-edge room cooling solutions, the holistic approach enables us to support a vast range of applications, from small computer rooms to enterprise data centers.
