

Construction site power generation and energy storage equipment

Overview

Can a battery energy storage system replace diesel-fuelled construction site equipment?

As a low carbon alternative, Battery Energy Storage System (BESS) has been viewed as a viable option to replace traditional diesel-fuelled construction site equipment. You can gain a better understanding and more knowledge on BESS adoption by our advisory services and General Guideline on BESS Adoption for Construction Sites (PDF).

Why is Shanghai Electric a leading power plant equipment supplier?

In response to the global climate change, Shanghai Electric as one of the world leading power plant equipment suppliers, has actively developed the emerging industries such as solar power generation, seawater desalination, energy storage equipment, air cooled equipment, dust-cleaning apparatus, electric drive, etc.

Should a battery energy storage system be installed for customer self-use?

For Developers: For Contractors: If a Battery Energy Storage System (BESS) will be installed for customer self-use, it should be ensured the BESS does not have capability to export power to or back energize the distribution network connected in parallel with the main grid.
