Container Generator UPS

Overview

What is jet power supply container type generator set?

Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation. We can supply the 20' container, 40' container, and widen or heighten container type.

How does an ups generator work?

When initiated the UPS will send a signal to the generator to start up. Once the generator is running, the UPS will switch to generator power. When the power outage is over and grid power is restored, the UPS will return to utility power and recharge its batteries. The generator will then shut down. How do generators work?

.
