Container power generation control room

Overview

What is a containerized operator control room?

The containerized control room is a fully equipped turnkey solution to accommodate the operator supervising a production plant. The containerized operator control room is complete with all safety equipment and equipment, is ready for use and suitable for installation in both temporary and permanent systems.

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

What are containerized generator / packaged container and enclosure options?

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package, we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble, convenient for maintenance and inspection.
