Containerized liquid cooling energy storage product EnerC

Overview

What is ENERC liquid cooled energy storage battery containerized energy storage system?

EnerC liquid-cooled energy storage battery containerized energy storage system is an integrated high energy density system, which is consisting of battery rack system, battery management system (BMS), fire suppression system (FSS), thermal management system (TMS) and auxiliary distribution system.

What is ENERC & how does it work?

Power packed: EnerC from CATL is a highly integrated storage solution that combines a liquid-cooled battery system, an UPS system, a fire suppression system, and a controller in one container. (Source: CATL) Enerc is a modular solution with a capacity of up to 10 MWh per container and is compatible with a variety of renewable energy sources.

What is ENERC liquid cooled container?

Totally, EnerC liquid-cooled container's configuration is 10P416S. Total 52 pieces lithium iron cells (280Ah/3.2V) in series connection are used for every battery module. For safety protection, an internal high speed DC fuse is included, and removable MSD switch can cut off the high voltage connection during transportation process.

What is ENERC+ container?

7) Independent UPS. EnerC+ container have integrated two UPS system, one is for FSS monitoring system which available capacity is 24 hours, another one is for BMS which available capacity is 20 minutes The UPS is only used to supply power to BMS components.

Containerized liquid cooling energy storage product EnerC

CATL presents liquid-cooling CTP energy storage solutions

CATL's EnerC, the world's first TEU containerized liquid cooling energy storage system, is able to achieve safe and reliable operation of the whole system for 20 years.
