

EQACC SOLAR

Containerized power distribution cabinet

Overview

What is a power distribution container (PDC)?

Prefabricated, tested, and ready for delivery. Your e-house, or Power Distribution Container (PDC), is engineered in our facility with pre-installed components and wiring completed. Systems are fully parameterized, and system testing is performed before shipment to expedite installation and startup time.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

What is a distribution room?

This “distribution room” is one of 16 No. Secondary E-House Substations providing in total 1.700 m² operating space for one of our customers in South America, Brazil. E-houses substations are equipped with medium- and low-voltage equipment, AC-UPS and DC systems with batteries installed in a separate battery room.

What is a multi-function ICT container?

Customized multi-function ICT containers, making outdoor data center suitable for living and office needs. One stop solution, integrating racks, monitoring, cabling, power, fire control and air-conditioning systems. Pre-engineering design, 1-week fast deployment, no building required, only construction field, power and network connection needed.

Containerized power distribution cabinet

Containerized Prefabricated Power Substation , Reliable

The Containerized Prefabricated Power Substation is a next-generation modular solution that combines intelligent substation equipment, factory-assembled secondary ...

Leading Custom E-House Manufacturers

As trusted e-house manufacturers, we design and build custom electrical enclosures for efficient power distribution and reliable industrial operations.
