Croatia export solar module requirements

Overview

How much energy does Croatia import?

Croatia imports about 54.54% of the total energy consumed annually: 74.48% of natural gas, 78.34% of oil and petroleum products, and 100% of its solid fossil fuel needs. Croatia also co-owns the Krško nuclear reactor in Slovenia, which is included in its energy mix as imported electricity.

What is Croatia's energy strategy?

In March 2025, the Croatian government updated its Energy Strategy for the period until 2030, with an outlook through 2050. The Strategy includes a wide range of energy policy initiatives that will improve energy security, increase energy efficiency, lower dependence on fossil fuels, increase local production, and increase renewable resources.

How much energy does Croatia use in 2023?

Energy intensity in the Republic of Croatia in 2023 amounted to 72.9 kgoe / 103 US\$ 2010 (according to purchasing power parity), 5.4 per cent lower than the average in the European Union (EU 27). Final energy consumption in 2023 amounted to 289.9 PJ and increased by 3.1 per cent compared to the previous year (281.1 PJ).

Will Croatia build small modular nuclear reactors in 2025?

In February 2025 Croatia has announced plans to build small modular nuclear reactors (SMRs) on its territory, marking a significant step toward enhancing its energy security. During 2025, Croatia has focused on developing a nuclear energy law, with a working group in place to draft the legislation.
