Cuba produces outdoor power supplies

Overview

Will Cuba get more solar energy by 2030?

By 2030, the country aims to generate more than a third of its electricity from solar parks and other renewable sources. Cuba on Friday unveiled a new solar energy park in the capital Havana, part of an ambitious project to alleviate the communist island's increasingly desperate struggle with power blackouts.

Although Cuba officially runs on 110V, many of the more modern hotels have 110/220V (dual voltage) outlets to cater to the lucrative European market.

What's going on with Cuba's power supply?

The dire state of Cuba's power generation infrastructure, largely dependent on oil from Venezuela, has seen the country of 10 million people struggle with near daily outages in some regions in recent months. In some provinces, electricity access is limited to a few hours a day.

What type of power outlet does Cuba use?

Cuba uses both Type A/B and Type C power outlets. Some hotels will use one type and others another, although plenty use both, sometimes even in the same room! As a result, you'll have to pack the proper adapter to recharge your devices while on the road.
