

EQACC SOLAR

Customer Support for 100ft Folding Containers for Refineries

Overview

Why do you need a lid for a foldable container?

Our foldable boxes come with a range of customizable features, offering flexibility for various industries and optimizing your logistics operations. Lids for foldable containers provide essential protection for contents, keeping items safe from dust, moisture, and contaminants during storage and transportation.

What makes faltsysteme a successful reusable container company?

In 1978 WALTHER Faltsysteme folded the first reusable containers. Since then, our container specialists have been renowned as the experts in the foldable plastic box market. Our success is based on the right fold: whether lengthwise or crosswise, with a hinge or without. This is largely defined by our customers' requirements.

Why should you choose a folding container?

Contact us! Folding containers can give up to an 80% saving in volume and are available in standard footprints and heights. Lid and closure options are also available.

How much space does an empty folding container save?

As an empty folding container can save a volume of up to 80 percent compared to an upright container, a maximum of five times as many empty folded containers can be stored on the same floor space than would be possible with rigid containers.
