Overview

What does 'new energy storage' mean for China?

Trade body China Energy Storage Alliance (CNESA) said last week (15 January) that 'new energy storage' capacity reached 78.3GW/184.2GWh by the end of 2024, a term it appears to use to describe technologies other than pumped hydro energy storage.

What makes DC group unique?

With a customer-centric approach, DC Group operates a highly efficient and intelligent factory that is fully controlled throughout the product lifecycle. The factory comprises seven modules and 46 production processes, all of which are monitored in real-time online to ensure exceptional product quality.

How much energy storage does Bess have?

Including all energy storage, its total installed capacity is now 137GW, meaning that 'new energy storage', mostly BESS, now exceeds its pumped hydro capacity. That is thanks to 43.7GW/109.8GWh of 'new energy storage' that was installed in 2024, CNESA said.

How much energy storage capacity will China have by 2024?

Separate figures, from the National Energy Administration (NEA) cited in state-owned Xinhua News Agency, said that the total installed capacity of new energy storage projects reached 73.4GW by the end of 2024. With an average duration that indicates a total capacity of around 73.4GW/168GW.
