Danish new energy battery cabinet

Overview

Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 – European Energy has started on its first large-scale battery storage project.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

Where is European energy launching its first battery energy storage system?

Copenhagen, Denmark — European Energy has commenced the development of its first battery energy storage system (BESS) project at the Kragerup Estate in Denmark. The project, known as the Kragerup project, is being delivered in collaboration with Kragerup Estate.

How will a battery help balance the power grid in Denmark?

In addition, the battery will offer crucial system services to help balance the power grid in eastern Denmark. It will store surplus renewable energy during periods of high production and supply it back to the grid when demand is high, improving overall energy efficiency.
