

EQACC SOLAR

Delivery time for 10MWh off-grid solar container

Overview

Transportable via standard shipping container, the system achieves full operational capability within 4-6 hours of arrival. Can a containerized Solar System be installed off-grid?

Off-Grid Installers have the answer with a containerized solar system from 3 kW up to 40 kW. Systems are fitted in new fully fitted containers either 20 or 40 feet depending on the size required.

What is an off-grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off-Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

What is an off-grid container & how does it work?

Access to a parts supply chain means that systems can be built quickly, efficiently and without compromise in the UK. The Off-Grid Container also transports the solar PV panels and mountings, the only part of the product which has to be assembled at the customer's site.

Are off-grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is a need to monitor and solve any problems. Off-Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.

Delivery time for 10MWh off-grid solar container

Off grid container power systems -- Off-Grid Installer

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.
