

**EQACC SOLAR**

# **Denmark Smart Photovoltaic Energy Storage Container Earthquake-Resistant**

## Overview

---

Where is better energy deploying its first battery storage project?

Developer Better Energy is deploying its first major battery storage project, a 10MW/12MWh system, at one of its solar PV plants in Denmark.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark be a leader in the global sustainability agenda?

With Denmark's ambition to be a leader in the global sustainability agenda, we need a center that creates awareness, drives collaboration and the sharing of knowledge across industry and knowledge institutions. This requires a significant and targeted effort.

## Denmark Smart Photovoltaic Energy Storage Container Earthquake-

### Denmark: Solar park with storage for grid stabilization

One of the largest BESS projects in Denmark Better Energy's BESS project is expected to provide 12 MWh of energy storage, one of the largest planned projects in ...
