# Distribution of the latest energy sites in China

## Overview

---

What is the summary of China's Energy and Power Sector Statistics?

The Summary of China's Energy and Power Sector Statistics is one of the research results of the China Energy Transition (CET) programme. It is published annually as a March special issue of the China Energy Policy Newsletter.

What is the growth rate of distributed energy in China?

Distributed energy growth in Hebei, Shandong, Shanghai, Tianjin, Jilin, Shanxi, Anhui, and Inner Mongolia provinces is faster, with average growth rates of 23.5%, 20.4%, 16.9%, 19.3%, 20.7%, 35.9%, 33.8. %, and 37.1% respectively. In other provinces, the output of distributed energy has grown slowly.

What is the China Energy Map?

The China Energy Map offers a comprehensive, interactive visualization of key energy infrastructure across China. Since its initial launch as the Baker Institute China Oil Map in February 2019, the map has undergone significant development and continues to expand.

How will the demand for distributed energy change in China?

On the contrary, industrial enterprises and residents will expand the consumption of traditional fossil fuels, so the demand for distributed energy will decrease. At present, China's fossil fuel consumption is mainly motor vehicles in the transportation sector.
