# **Dm6 battery inverter**

## Overview

---

What is a Uno DM 6.0-plus single-phase inverter?

The new UNO-DM-6.0-PLUS single- phase inverter is an upgrade of the proven UNO family and is an optimal solution for residential installations. (RTU/TCP) communication protocol, Sunspec compliant, allow the inverter to be easily integrated within any smart environment and with third party monitoring and control systems.

What is a Uno DM 6.0 TL-plus-b-g inverter?

Catalog Description: UNO-DM-6.0-TL-PLUS-B-G Inverter Long Description: Single-phase string inverter, 6000Wac, 2 MPPT, Wireless communication channel, Dynamic feed-in control and load manager capabilities (UNO-DM-COM-KIT required), Integrated user interface, Modbus SunSpec RTU/TCP, IP65 (NEMA4x).

What is ABB string inverter Uno-dm-6.0-TL-plus?

ABB string inverters UNO-DM-6.0-TL-PLUS 6 kW The new design wraps ABB's quality and engineering into a lightweight and compact package thanks to technological choices optimized for installations with different orientation. (2 MPPT).

Where can I find information about a Fimer inverter?

Page 20 The officially required information is located on the Regulatory label. The Wireless Identification label is an accessory label which shows the information necessary for the identification and characterisation of the inverter by FIMER. The labels are NOT to be hidden by foreign objects and parts (bags, boxes, equipment, etc.);.
