

EQACC SOLAR

**Do you want an appliance
repairman to repair your solar
container outdoor power**

Overview

Who is responsible for solar panel repair and maintenance?

The solar company will be responsible for repair costs and solar panel maintenance because they are the owner of the solar panels, not you. There are a few different kinds of solar panel warranties that cover different components of the system.

How much does a solar panel repair cost?

On average, an on-site solar panel repair costs between \$400 and \$1,000, depending on the issue. If the issue requires a technician to come to your house, it costs anywhere from \$200 to \$300 just to get the truck to you. Additional labor for diagnostics and replacement of defective parts adds to the cost, to the tune of \$150 or more per hour.

What are the most common residential solar panel repairs?

Luckily, we've identified the top five most common residential solar panel repairs and the roles you, your warranty, and your solar installer will play in getting them fixed. The five most common solar panel repairs are monitoring/software issues, inverter hardware issues, roof leaks, wiring issues, and damaged solar panels.

Does a solar panel warranty cover labor?

Solar panel warranties typically cover installation errors and equipment failures, but many do not cover labor to perform the repairs. Premium product warranties and pre-paid solar insurance coverage do tend to cover repairs and include labor cost coverage.
