

# Does the United States need energy storage for new energy

## Overview

---

Is US energy storage set a Q1 record in 2025?

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Which states are deploying more energy storage in Q1?

“We’re now seeing significant deployment in emerging markets like Indiana, while states across the Southwest like Nevada and Arizona continue to expand their energy storage portfolio,” said Noah Roberts, VP of Energy Storage at ACP. Residential storage also set a new record, with 458 MW installed in Q1, the most ever in a single quarter.

Is New York a good place to invest in energy storage?

New York is a region to watch for storage growth, as its policy landscape is shifting toward the California approach. The New York climate law, the Climate Leadership and Community Protection Act, adopted a more aggressive clean energy standard for the power sector, as well as energy storage mandates.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

## Does the United States need energy storage for new energy

---

### Charging Up: The State of Utility-Scale Electricity Storage in ...

Grid-scale energy storage has been growing in the power sector for over a decade, spurred by variable wholesale energy prices, technology developments, and state and federal ...

## New Energy Storage Technologies Empower Energy ...

KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower ...

### US energy storage set a new record in Q1 ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

## Energy Storage Strategy and Roadmap , Department of Energy

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage ...

### **Solar, battery storage to lead new U.S. generating capacity ...**

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

### **U.S. adds record amount of battery energy storage in first ...**

Battery storage plays a critical role in the transition to renewable energy and keeping the lights on. The American Clean Power Association reported that the United States ...

### **How energy storage could solve the growing ...**

In 2024, energy storage became one of the most dynamic and consequential forces shaping the US energy transition. According to a ...

---

**Energy storage industry set aggressive goals ...**

The battery storage industry in the U.S. has grown in leaps and bounds in recent years, surpassing its most aggressive targets to become ...

**Why do we need energy storage systems?**

The continuous advancements in technologies associated with energy storage create vast opportunities to address challenges in energy ...
