# **Does the home solar light have monitoring**

## Overview

---

What is a solar monitoring system?

Solar monitoring systems provide a real-time snapshot of solar energy production data from your home solar system. A good monitoring system can tell you when one or more panels (aka “modules”) isn’t producing as much energy as others, or whether there’s some sort of electrical fault causing you to miss out on precious kilowatt-hours (kWh).

Why should you use solar monitoring?

You can use solar monitoring to track your system’s performance over time, assist in troubleshooting various problems, track your solar investment’s financial performance, and give you peace of mind that everything is working as it should. There are three main types of solar monitoring systems:.

How does the Sense solar energy monitor work?

The Sense monitoring system also records excess power sent to the grid from your solar panels, so that over time you can get an accurate record of renewable energy production, consumption, and grid export. For folks without a monitoring setup, adding the Sense Solar energy monitor is relatively easy.

Does Tesla offer home solar monitoring?

What the Tesla app does allow is the homeowner to set up their preferred method of battery backup or self-consumption to maximize financial benefits. One big point against Tesla is that it only offers monitoring through its mobile app. There is no Tesla web portal for home solar monitoring.
