# **Does the solar industry need glass**

## Overview

---

Why is the solar PV glass market growing?

Government rules that are favorable to the development of solar PV plants is one of the factors driving the growth of the solar PV glass market. Additionally, the market for solar PV glass is growing due to the surge in demand for solar systems on a residential, commercial, and utility scale.

What is the global solar PV glass market size?

The global solar PV glass market size was valued at USD 3.23 billion in 2016. The growing emphasis on the adoption of clean energy sources is likely to be the key driver for the market growth in the coming years. Clean & renewable energy is an affordable alternative to fossil fuel-based electricity.

What is solar glass?

Solar glass is a specific kind of glass that is intended to collect and produce solar energy. It is sometimes referred to as photovoltaic glass or solar PV glass. It is utilized in many solar applications, particularly solar panels and building-integrated photovoltaics (BIPV).

What is the size of solar glass market?

Based on type the solar glass market is classified as 3.2mm, 2.5mm, 2.0mm and others. Based on application the solar glass market is classified as single glass module, double glass module and others. "Various Green Benefits and Hazardous Eliminations to Double the Market Share"
