EK Wind Power System

Overview

What are wind energy systems?

Wind energy systems harness the kinetic energy from wind and convert it into electricity, playing a crucial role in the global shift towards sustainable energy solutions.

What is ekwil – a 50/50 floating offshore wind joint venture?

Technip Energies and SBM Offshore announce the formal implementation of Ekwil, a 50/50 floating offshore wind joint venture. Ekwil is a pure player delivery partner offering a diversified range of series production floating offshore wind solutions to meet the growing and demanding needs of energy customers around the world.

What will ekwil do for floating offshore wind?

“By bringing together two world leading players, Ekwil will accelerate the deployment of industrial solutions for the nascent Floating Offshore Wind market,” said Arnaud Pieton, Technip Energies CEO.

What is ekwil & float4wind?

Ekwil brings together expertise and experience of two energy transition leaders to collectively power progress with semi-submersible INO by Technip Energies and Tension Leg Platform Float4Wind by SBM Offshore. This approach covers a large spectrum of the FOW market, aiming to bring these technologies to commercial deployment.
