# **Energy Storage Flow Battery Company**

## Overview

---

Who are the best flow battery companies in China?

Shenzhen ZH Energy Storage Technology Co., Ltd. has once again made the list of companies from mainland China (In 2023, Zhonghe Energy Storage was recognized as the only startup company from mainland China among the top 10 most noteworthy flow battery companies globally.).

Are flow batteries the future of energy storage?

Flow batteries, with their ability to create a more stable grid and reduce grid congestion, are considered a promising technology for energy storage. Their adoption is closely linked with the surging energy storage market and can help fill renewable energy production shortfalls.

What are flow batteries used for?

Flow batteries help create a more stable grid and reduce grid congestion and fill renewable energy production shortfalls for asset owners. Global R&D is fueling the development of flow battery chemistry by significantly enabling higher energy density electrodes and also extending flow battery applications.

How will the flow battery market grow?

The flow battery market is expected to grow significantly as the share of renewables increases in the primary energy mix. Despite their higher CapEx cost compared to lithium-ion batteries, flow batteries are expected to be used extensively for both front-of-the-meter and behind-the-meter applications in the next several years.
