

## EQACC SOLAR

# Energy storage cell production equipment

## Overview

---

What is battery manufacturing equipment?

Battery manufacturing equipment refers to the machines and systems used for battery production, fabrication, assembly, and testing. This complex process may require the use of coating systems, bonding and sealing solutions, adhesive dispensers, slot dies, battery testing equipment and more.

What equipment do you need for battery cell production?

Cell formation equipment. Slurry mixers and coating machines. Complete battery cell production systems. Maximum weighing precision and zero contamination: Tailor-made system concepts and processing technology for top product purity.

What is cell manufacturing?

Cell manufacturing covers a lot of specialist areas and hence there is a range of equipment suppliers. The cell manufacturing process is laid out in 14 steps covering everything from mixing chemicals, dryers, printing and electrical testing.

How can a battery production line be sustainable?

Innovations such as simultaneous cell formation processes, seen in companies like Tesla and Panasonic, exemplify how global manufacturers are optimizing battery production lines to meet the demands of electrification and sustainable energy storage worldwide. - Equipment manufacturing can rely on green production.
