## Overview

---

What is Brazil's largest battery storage project?

Further details about Brazil's largest battery storage project to date have been revealed including its integrators and equipment providers. The inauguration of the 30MW/60MWh system took place last year, on the networks of transmission system operator (TSO) ISO CTEEP, as reported by Energy-Storage.news in November.

Are energy storage systems economically attractive in Brazil?

In Brazil, the limited variation in electricity prices along the load curve does not favour the operation of energy storage systems. Such projects are economically attractive when they can purchase energy at low prices and sell it during periods of high demand.

How big is Brazil's electricity sector?

Investment in the Brazilian electricity sector is expected to reach over \$100 billion by 2029, including utility-scale generation, distributed generation, transmission, and distribution projects. Brazil's electricity matrix is one of the cleanest in the world and Brazil is committed to continuing its support for renewable energy projects.

What is the largest source of electricity in Brazil in 2024?

In 2024, solar power, when including distributed generation, became the second largest source of electricity in Brazil, surpassing wind power, and reaching almost 50 GW. Utility scale solar energy in Brazil reached 16.4 GW, while distributed generation from solar accounted for 34 GW in 2024.
