

**EQACC SOLAR**

# **Energy storage substation construction budget**

## Overview

---

Who estimated the substation costs?

Substation costs were estimated by each Jurisdictional Planning Body (JPB) for the substations within its jurisdiction, based on defined technical requirements/ high level specifications.

What do you need to know about substation construction?

Must be familiar with all phases of substation construction including site work, excavation, carpentry, concrete work, steel work, fencing, buildings, grounding, installation of both metallic and non-metallic conduit, and their underground facilities.

Are battery storage costs based on long-term planning models?

Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-term planning models and other activities. This work documents the development of these projections, which are based on recent publications of storage costs.

Do projected cost reductions for battery storage vary over time?

The suite of publications demonstrates wide variation in projected cost reductions for battery storage over time. Figure ES-1 shows the suite of projected cost reductions (on a normalized basis) collected from the literature (shown in gray) as well as the low, mid, and high cost projections developed in this work (shown in black).

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled
