How do I connect MBus to a solar inverter?

Tap Log in and go to the solar inverter screen. Choose Settings > Communication configuration > Parallel system communication parameter settings > MBUS. Insert the Dongle into the inverter whose parallel communication parameter is MBUS. Ensure that the parallel communication parameter of other inverters in the parallel system is NA. d.

How do I connect multiple inverters to a PV system?

When there is only one inverter in the PV system, connect the additional grounding cable to a nearby grounding point. When there are multiple inverters in the PV system, connect grounding points of all inverters and the PV array frames to the equipotential cable (according to the onsite conditions) to implement an equipotential connection.

How does a fusion solar inverter connect to a phone?

Can connect to LUNA2000 batteries. The inverter connects to the FusionSolar Smart PV Management System through the 4G Smart Dongle. The inverter connects to a phone through a Smart USB-WLAN Adapter (shortened to WLAN module in this document), Bluetooth module, or a data cable.

How do I connect my solar inverter?

Then, scan the QR code on the WLAN module or the bar code on the Bluetooth module, or manually connect to the device via the WLAN hotspot, Bluetooth, or USB port to access the device commissioning screen. Enter the login password. Tap Log in and go to the solar inverter screen.
