

EQACC SOLAR

European Foldable Container Off-Grid Type

Overview

What is an off-grid Solar System?

(coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container - not hooked up to the power grid and working completely autarkically. The system provides up to 80kW of discharge power and supplies plugged-in consumers with power - even when the sun doesn't.

What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.

What is a solarfold container?

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants.

What are the possible on-grid versions?

The following are possible On-Grid versions: (coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container - not hooked up to the power grid and working completely autarkically.

European Foldable Container Off-Grid Type

Solarcontainer: The mobile solar system

The base of the Solarcontainer is a solid floor frame with the length and width of a 20f HC container. Mounted on this frame is the innovative PV rail system and the clever folding ...
