# **Factory price thermal breaker in Uk**

## Overview

---

What are thermal magnetic circuit breakers?

Thermal magnetic circuit breakers are devices that provide protection against overcurrent in circuits. Circuit breakers use an automatically operated electrical switch to disrupt the flow of current when an overload or short circuit is detected. Thermal magnetic circuit breakers do this using an electromagnet and bimetallic strips.

What are thermal automotive circuit breakers?

Thermal automotive circuit breakers are devices used to break the flow of current in automotive circuits, in order to protect them against a fault such as overcurrent or short circuit.

What are the different types of thermal breakers?

Thermal breakers protect circuits from excess current in a similar way to a fuse, however, they often feature a switch allowing them to be reset if tripped. Common types of thermal breakers include thermal magnetic circuit breakers and thermal automotive circuit breakers.

How many thermal circuit breakers are there?

### Push Button Panel Mounting Thermal Circuit Breaker

Thermal Circuit Breaker / Panel Mount / Red Push Button / Reset Time 1 Minute / Single Pole / 4A 250Vac / Supplied without Fixing Nut / 6.3mm QC Terminals / UL, TUV, RoHS / BM15-0400.

[Get Price](#)

### IP68 thermal circuit breaker 70° , JPR Electronics Ltd

Miniature temperature sensitive bi-metal auto-resetting circuit breakers, housed in a vacuum sealed plastic casing meeting IP68 environmental protection standard.

[Get Price](#)

### Thermal Circuit Breakers

Techna's range of push to reset thermal circuit breakers for thermal overload and short circuit protection. Current ratings from 0.5A to 45A, AC and DC voltages. Order online!
