

**EQACC SOLAR**

# **Features of Bern solar container prefabricated cabin**

## Overview

---

What can be included in a prefabricated container?

Fittings, such as air conditioning, security systems, sockets and cabling for technology and computer networks, desks, security measures, and cabinetry, can also be included in these portable cabins. The Module-T team is on hand to guide and support you throughout the design and build of your prefabricated container.

What features can be added to a portable cabin?

Our standard portable cabins can all be highly amended to include additional strength, insulation, electric and utility sockets, security cameras and alarms, heating and cooling systems, upgrades to the flooring, windows and doors, guard rails and other features.

What is a portable cabin?

Portable cabins offer a practical solution to expand an existing site or create a purpose-built labour camp or industrial workspace from scratch. They can be used on both a temporary and permanent basis, and each container can be customised in many ways to fit its purpose and environment.

Why should you choose a portable cabin?

This results in significant financial and time savings compared with conventional brick-built constructions. Portable cabins offer a practical solution to expand an existing site or create a purpose-built labour camp or industrial workspace from scratch.
