

EQACC SOLAR

Fiji high frequency ups uninterruptible power supply

Overview

What does Fuji Electric do?

Fuji Electric supplies products that incorporate power electronics technology, to improve the efficiency and stability of energy, such as UPS and PCS. To handle power source troubles such as outages and voltage fluctuations, our UPS are embedded in information devices and facilities equipment such as servers and supercomputers.

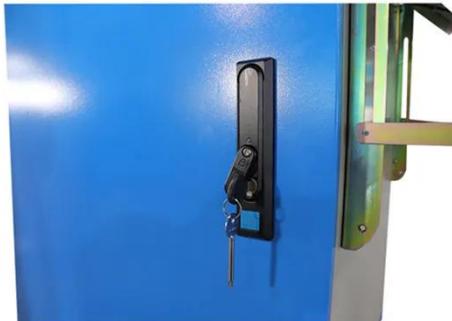

How can ups reduce power losses in data centers?

Reducing power losses in UPS equipment by 40% contributes to improved PUE * in data centers. We provide systems like common stand-by and parallel redundant systems that can continuously provide a supply of power 24 hours a day, 365 days a year. Reduced footprint of facility equipment enables space to be secured for server equipment.

Why should you choose Fuji Electric thyristor DC power supply units?

Fuji Electric's highly reliable thyristor DC power supply unit is the fruit of our substantial expertise in large-current technology nurtured over the years. Select the most suitable design for your facility, based on the wealth of available options.
