Financing for a 500kW Smart Photovoltaic Energy Storage Container Project

Overview

Leverage Project Finance and PPAs: Secure non-recourse debt and long-term revenue contracts like Power Purchase Agreements (PPAs) to attract investors and lenders for large-scale energy storage projects. Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Why is project finance difficult for energy storage?

It has traditionally been difficult to secure project finance for energy storage for two key reasons. Firstly, the nascent nature of energy storage technology means that fixed income lenders and senior debt providers are naturally risk averse.

Are solar and wind projects a good investment?

These projects will have long-term predictable revenue streams. In addition, lenders may be willing to finance merchant cashflows, but with less leverage and subject to detailed market studies and cash sweeps. These trends for solar and wind projects also apply to energy storage projects.

 Efficient Higher Revenue

 Intelligent Simple O&M

 Flexible Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 100% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules
- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
