Finland HJ Communication 5g fast installation base station project

Overview

What is 5G test network Finland?

5G Test Network Finland (5GTNF) consortium offers an integrated technological environment for research and trials. The aim of the 5G-FORCE project is to study and develop 5G technology and the related 5G test network environment for the needs of research and development projects of various verticals.

How did the Telia 5G trial work?

The trial was achieved through Nokia's industry-leading 5G Core Software as a Service (SaaS) and AirScale 5G base stations powered by ReefShark System-on-Chip technology, connected to Telia's commercial network.

How can 5G technology improve military communications?

Companies showcase the potential of 5G technology in enhancing critical communications for defense units operating within coalition environments. Leverage Telia's network infrastructure powered by Nokia's 5G Standalone Core and, AirScale radio equipment, to ensure seamless experience, even when crossing country borders.

Who is achieving world's first 5G standalone slice handover across borders?

Press Release Nokia, Telia and Finnish Defense Forces achieve world's first 5G standalone slice handover across borders Companies showcase the potential of.

Home Energy Storage (Stackble system)

- 
High Efficiency
- 
Easy installation
- 
Safe and Reliable
- 
Perfect Compatibility

Product Introduction

-  Scalable from 10 kWh to 50 kWh
-  Self-Consumption Optimization
-  Integrated with inverter to avoid the compatibility problem
-  LFP battery, safest and long cycle life
-  Stackable design, effortless installation
-  Capable of High-Powered
-  Emergency-Backup and Off-Grid Function

Integrated Energy Cabinet Project for Carrier Base Stations

Project Overview With the large-scale deployment of 5G networks, base station power consumption has increased by 3-4 times compared to 4G, posing significant challenges to ...
