

EQACC SOLAR

# Finnish electromagnetic solar container battery

50KW modular power converter

#### Flexible Configuration

- Modular Design, Expanding as Required
- Small&Light, Wall Mounted
- Installed in Parallel for Expansion

#### Powerful Function

- Support PV+ESS
- Grid Support, Equipped with SVG Technology
- On-Grid and Off-Grid Operation

#### Reliable Protection

- Outdoor IP65 Design
- Sufficient Protection Functions Equipped

## Overview

---

What is Finland's sand battery?

In a revolutionary leap for clean energy, Finland has launched the world's first industrial-scale sand battery, a groundbreaking technology that promises to significantly reduce emissions and enhance energy stability by storing surplus renewable energy as heat for local distribution.

Can battery storage support Finland's power grid?

One of the world's northernmost battery storage systems is now supporting Finland's power grid as part of a joint venture between Sungrow and FRV AmpTank. In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid.

What is the world's largest sand battery?

Lottie Limb writes on the Euronews website about the world's largest sand battery. The 15 metres wide battery can store a month's heat demand in summer. 'A very Finnish thing': Big sand battery starts storing wind and solar energy in crushed soapstone The world's largest sand battery has started working in the southern Finnish.

Where is Finland's new battery storage facility located?

In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid. The plant, equipped with 26 PowerTitan 1.0 containers from Sungrow, delivers 30 MW of output and 60 MWh of storage capacity.

## Finnish electromagnetic solar container battery

### Finland's Sand Battery Breakthrough

Finland's sand battery technology stores energy as heat instead of electricity, in contrast to conventional battery storage systems like lithium-ion. It uses excess renewable ...
