Flat roof solar panel installation

Overview

Can solar panels be installed on a flat roof?

If you want to install solar panels on a flat roof, the solar panel must remain at least as far from the edge of the roof as the solar panel is high. For example, if the highest point of the solar panel is 60 centimeters, the distance from the roof edge must also be at least 60 centimeters. Do you want to install solar panels on the ground?

You can.

Can you put solar panels on a slanted roof?

While you can lay solar panels flat against a slanted roof, there's some specialized equipment necessary to mount solar panels on a flat roof. Angled mounts assist with sunlight exposure and energy output.

How do you mount solar panels on a flat roof?

Mounting systems for PV-panels placed on flat roofs should either be mechanically attached to the roof or need to be supported by ballast, to make sure that the solar mounting system is unable to be lifted, tipped over or slide.
