

Flexible solar panel awning

Overview

What is the world's first flexible solar awning?

Described by its distributor, Australian RV Accessories Pty Ltd, as 'the world's first flexible solar awning', this electric roll-in, roll-out awning essentially swaps traditional fabric for flexible solar panels, allowing RV owners to generate their own power anywhere they roll their awning out, in favourable sunny conditions.

How are solar canopies & awnings changing how we use solar energy?

Solar canopies, awnings, and walkways are changing how we use solar energy. If you want a simple setup or a custom design, Lumos offers smart, flexible, and efficient solutions. Lumos solar canopies, awnings, and walkways use bifacial panels that collect sunlight from both the front and back.

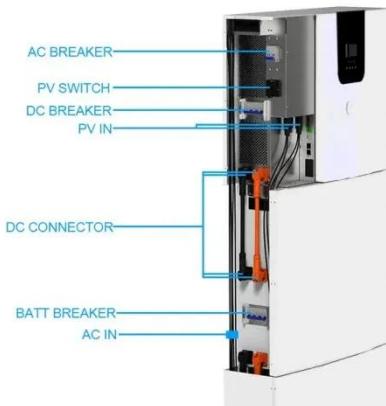

How much power does a flexible solar awning provide?

The Flexible Solar Awning is available in two models, each tailored to meet different power needs: LA12850 (12ft): 850W power output, 105V nominal voltage, and 70A peak amperage @ 12V. Ideal for smaller setups requiring robust power output. LA161050 (16ft): 1050W power output, 95V nominal voltage, and 88A peak amperage @ 12V.
