French lithium iron phosphate battery pack

Overview

What is a lithium iron phosphate battery?

Lithium Iron Phosphate batteries first appeared in the early 2000's and are increasingly used in robotics and energy storage. Lithium Iron Phosphate (LiFePO₄) batteries have a nominal voltage of 3.2V and are an excellent solution for applications requiring a lightweight, high capacity battery with a long lifespan and stability at high temperatures.

Are lithium iron phosphate batteries better than other lithium ion chemistries?

Despite having a lower energy density than other lithium-ion chemistries, lithium iron phosphate batteries can provide better power density and longer life cycles. Emerging Power is your premier lithium battery assembler. We manufacture custom lithium iron phosphate battery packs and assemblies for many applications.
