

EQACC SOLAR

Fully automatic solar container lithium battery station cabinet production line base station

Overview

Will BYD supply lithium-ion cells for Tesla's made-in-China energy storage systems?

BYD's FinDreams battery unit will supply lithium-ion cells for Tesla's made-in-China energy storage systems. Tesla's battery energy storage systems (BESS) in China are expected to consist of LFP lithium-ion battery cells from both CATL and BYD.

Who makes a battery – CATL or BYD?

CATL supplies various companies, while BYD produces batteries mostly for its own needs but also for clients through its FinDreams business unit. Tesla started construction of its BESS factory (also known as the Megafactory) in the Lingang area of Pudong, Shanghai, in May, with a plan to start production in Q1 2025.

What is cathode material in lithium ion bat?

The cathode material is one of the key core materials of lithium ion bat. From the technical aspect, the specific capacity performance of graphite. Graphitization process is a process in which the carbonaceous material i. As the first commercialized anode electrode material for lithium-ion bat.
