

**EQACC SOLAR**

# **Germany solar container communication station solar container lithium battery factory**

## Overview

---

Where is Germany's largest battery storage facility?

Bollingstedt / Kirchheim near Munich, 5 June 2024. Germany's largest battery storage facility is now online and has been officially inaugurated. Since April, a 103.5 MW / 238 MWh storage system has been operating in Bollingstedt, Schleswig-Holstein, contributing significantly to the urgently needed energy transition.

Can Germany use solar energy?

However, renewable energies come with a catch: Due to a lack of storage capacity, Germany cannot fully leverage the potential that solar energy offers. During sunny and windy phases, wind and solar park operators have to throttle or even shut down their systems repeatedly to avoid overloading the power grids.

Where are lithium ion batteries stored?

Strategically located on approximately 1.2 hectares near Bollingstedt in wind-rich northern Germany and in close proximity to a substation, the facility comprises 64 containers housing lithium-ion batteries and 32 containers for inverters and transformers.

Will Germany add more power storage projects in 2023?

Germany will likely add many more projects in the coming months, as the federal government increasingly focuses on storage solutions. In December 2023, the Federal Ministry for Economic Affairs and Climate Action (BMWK) published its "Power Storage Strategy" to accelerate the development of new capacities.
