Global solar Modules

Overview

What is the global solar module manufacturing capacity?

Global solar module manufacturing capacity is set to exceed 1.5 TW by 2035, according to forecasts from the IEA. Its latest report, “ Energy Technology Perspectives 2024,” covers the production of solar, wind turbines, electric cars, batteries, electrolyzers, and heat pumps.

Who are the top 20 global photovoltaic module manufacturers?

During the conference, PVBL announced its annual ranking of the top 20 global photovoltaic module manufacturers. In 2024, the global solar module market continued to see the strongest players thrive, with the top four enterprises — JinkoSolar, LONGi, Trina Solar and JA Solar — collectively shipping over 320GW and dominating the industry.

What are the key characteristics of global PV module manufacturers?

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four dimensions: technological capability, vertical integration, international presence, and performance in the European market.

Which manufacturers ship N-type solar modules?

N-type modules accounted for the majority of shipments from several top-tier manufacturers. Jinko Solar, the top global shipper, reported that over 87% of its 2024 shipments were N-type. However, TOPCon remained the leading advanced technology, with average conversion efficiencies exceeding 24%.
