

EQACC SOLAR

Greece has BESS solar container outdoor power

Overview

Is Greece ready for a battery energy storage system in 2025?

In 2025, Greece has accelerated its plans for utility-scale Battery Energy Storage Systems (BESS), signalling a shift in policy, financing, and market expectations. However, while the scale of ambition is high, there are several tensions emerging—especially around the move toward unsponsored (merchant) projects.

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Does Greece need a battery energy storage system?

Greece has initiated a series of competitive tenders to bolster its energy storage infrastructure, aiming to integrate significant battery energy storage systems (BESS) into its electricity grid. These tenders are part of a broader strategy to enhance grid flexibility and support renewable energy integration.

Why is sunny Greece a good place to invest in solar energy?

Sunny Greece struggles with an overabundance of solar generation, which creates a valuable opportunity for BESS (battery energy storage systems) to provide flexibility and relieve grid pressure. Greece has become a dynamic renewables market, rapidly scaling solar and wind deployments alongside EU-aligned energy reforms.

Greece has BESS solar container outdoor power

Greece awards 189 MW of battery storage in third auction

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of ...

PPC starts building capex support-winning ...

Public Power Corporation (PPC) has launched construction on two BESS projects in Northern Greece totalling 98MW/196MWh of ...
