Greek Solar System Battery

Overview

How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

How much battery storage will Greece have in 2024?

By the end of 2024, Greece's third battery storage auction will offer 200 MW of standalone battery projects, bringing the total capacity from all three auctions to 900 MW, inching closer to the initial goal of 1,000 MW. The 1,000 MW battery storage target was set in 2021 as part of Greece's National Recovery and Resilience Plan.

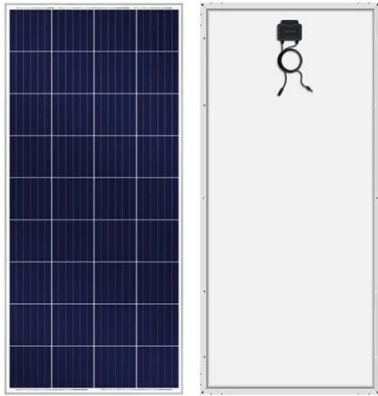

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

What is Greece's battery storage target?

The 1,000 MW battery storage target was set in 2021 as part of Greece's National Recovery and Resilience Plan. This plan was initially introduced in response to the COVID-19 pandemic but shifted focus to support Greece's green energy transition.
