Hanoi solar container battery air transport plan

Overview

What is the future of Transportation in Vietnam?

At least 10% of short-distance flights will use sustainable fuel. From 2040: 100% vehicles operating in airfields will use electricity or green energy. From 2025: 100% new buses will use electricity or green energy. Public transport coverage is expected to reach 45% - 50% in Hanoi; 25% in Ho Chi Minh City; at least 5% in class-I urban areas.

What is the future of public transport in Ho Chi Minh city?

Public transport coverage is expected to reach 45% - 50% in Hanoi; 25% in Ho Chi Minh City; at least 5% in class-I urban areas. From 2030: at least 50% vehicles and 100% new taxis will use electricity and green energy. By 2050: 100% buses and taxis will use electricity and green energy.

Did Marubeni launch a megawatt-scale battery storage demonstration project in Vietnam?

The project's official inauguration event held in December. Image: VinGroup. A green energy subsidiary of Japanese conglomerate Marubeni has brought online a megawatt-scale battery storage demonstration project in Vietnam.

How much power will Vietnam have by 2030?

The plan also called for 300MW of battery storage deployment and 2,400MW of pumped hydro energy storage (PHES) by 2030. State-owned public power company Vietnam Electricity (VE), is participating in a 50MW/50MWh grid-scale BESS pilot project which marks a first step towards that BESS goal.
