Heishan 5g base station construction unit service

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

What is the world's first 6G field test network?

In July, China successfully developed what it claimed to be the world's first 6G field test network that integrates communications with intelligence, demonstrating that 6G-level transmission capabilities can be achieved using existing 4G and 5G platforms, according to the report.
